Professional Summary

Machine Learning Engineer with expertise in deep learning, computer vision, and NLP. Strong experience in Python, TensorFlow, and cloud-based AI solutions.

Work Experience

ML Engineer | AI Innovations | 2020 - Present

- Developed and optimized deep learning models for image classification.
- Designed NLP pipelines for sentiment analysis, achieving 92% accuracy.
- Implemented distributed training using TensorFlow on AWS.

Data Scientist | Insight Analytics | 2018 - 2020

- Built predictive models for customer churn analysis.
- Designed automated feature engineering pipelines for large datasets.

Skills

- Machine Learning: TensorFlow, PyTorch, Scikit-learn

- Programming Languages: Python, R, SQL
- Cloud & Big Data: AWS SageMaker, GCP AI Platform
- Tools: Docker, Kubernetes, Git

Education

Master's in Data Science
ABC University | 2018

Certifications

- TensorFlow Developer Certificate
- AWS Certified Machine Learning – Specialty

Projects

- **Autonomous Driving AI** – Developed an object detection model for self-driving cars.
- **AI Chatbot** – Built a chatbot using NLP and deep learning techniques.
